

**Your ideas,  
our passion!**

## HOW WE CAN HELP YOU

**Do you have a project in your roadmap with changing requirements and flexible scope?**

Time and Material model will suit you best. You will pay only for time and resources spent on the project. It supports an agile development process, as there are situations and projects that demand flexibility from all the parties involved.

**Do you have an idea, which is well-defined and the requirements are clear?**

Fixed Price is the best option for you. We'll settle on a cost and timeline, which will never change, unless you want to add more features to the initial list.

**Are you looking for long-term cooperation for your project?**

Then Dedicated Team is your option. ITWorks provides easily scalable teams involved on a part or full-time basis and paid for the hours worked.

**Do you require a special approach to your development process?**

We are happy to combine any of the above and build a Hybrid Model which will be tailored in accordance with your business needs and priorities.

## WHAT YOU NEED TO KNOW ABOUT US

You're in safe hands, with our 10+ years of experience in Web and App Development, over 50 happy clients, with more than 150 great projects completed, we've accumulated multiple insights from numerous fields and industries.

We've built eCommerce platforms of various complexity, iOS, Android and Cross-Platform solutions, ERP systems with deep integrations, improvements and customized blocks for our corporate partners. Our design team will help you bring your ideas to life, while an experienced QA team will make sure that no bug slips through with their precise approach. ITWorks Digital Marketing Team will make your product famous by bringing years of experience to the table.
